15. Suggested Procedures for Administering Medicines

1. Introduction

The Governing Body of Widmer End Community Combined School will ensure that all children with medical conditions, in terms of both physical and mental health, are properly supported in school so that they can play a full and active role in school life. To help achieve this, the school has adopted the Department for Education policy on 'Supporting Pupils at School with Medical Conditions', which was issued under Section 100 of the Children and Families Act 2014.

The aim of this policy is to ensure that the parents of children with medical conditions feel confident that the school will provide effective support and that children feel safe and reach their full potential.

Some children with medical conditions may be considered to be disabled under the definition set out in the Equality Act 2010. The school will comply with their duties under the Act to make reasonable adjustments to support pupils with disabilities.

Some children with medical conditions may also have special educational needs (SEN) and may have an Education, Health and Care (EHC) Plan which brings together health and social care needs as well as the provision for their special educational needs. Where the child has a special educational need identified in a statement or EHC plan, the individual healthcare plan will be linked to or become part of that statement or EHC plan. The Healthcare Plan will be developed with the child's best interests in mind to ensure that the risks to the child's education, health and social wellbeing are managed, and minimises disruption, for children with medical conditions.

Supporting a child with a medical condition during school hours is not the sole responsibility of one person. The school will work collaboratively with parents, pupils, healthcare professionals (and, where appropriate, social care professionals) and local authorities to ensure that needs of pupils with medical conditions are met effectively.

2. Roles & Responsibilities

2.1 The **Governing Body** for Widmer End Community Combined School will ensure that

- Arrangements are in place so that children with medical conditions:
 - Are properly supported;
 - Can play a full and active role in school life;
 - Can remain healthy and achieve their academic potential;
- Staff are properly trained to provide the support that pupils need.

Widmer End Community Combined School & Pre-School

Supporting Pupils with Medical & Health Conditions

- Policies, plans, procedures and systems put in place are sufficient to meet their statutory responsibilities, are properly and effectively implemented and regularly reviewed.
- In line with their safeguarding duties, ensure that the health of all pupils is not put at unnecessary risk from, e.g. infectious diseases.
- In those circumstances, they do not have to accept a pupil at a time where it would be detrimental to the health of that child or others to do so.

2.2 The **Headteacher** will ensure that:

- A person is appointed to have overall responsibility for the implementation of this policy;
- All staff are aware of the policy for supporting pupils with medical conditions and understand their role in its implementation;
- All staff, including supply staff who support children with medical needs, receive sufficient information to provide appropriate support;
- Individual Healthcare Plans are developed, monitored and reviewed annually or earlier if evidence is presented that the child's needs have changed. Where appropriate Healthcare Plans will be reviewed at the child's Annual Review.
- Sufficient staff are suitably trained and achieve the necessary level of competency before they take on responsibility to support children with medical conditions;
- Sufficient numbers of trained staff are available to support all individual healthcare plans to cover staff absence, contingency and emergency situations;
- A register is kept of children in the school who have been diagnosed with asthma and/or prescribed a reliever inhaler;
- All staff are trained to recognise the symptoms of an asthma attack (and are able to distinguish them from other conditions with similar symptoms);
- At least one emergency inhaler kit is maintained and readily available in an emergency situation.
- Staff are trained to use a defibrillator, which is on site, maintained and readily available in an emergency situation.
- Risk assessments for school visits, holidays, and other school activities outside of the normal timetable are undertaken for children with medical conditions;
- All staff are aware that medical information must be treated confidentially;
- School staff are appropriately insured and are aware that they are insured to support pupils in this way.

2.3 Appointed Person

The head teacher has been appointed to have overall responsibility for implementing the school's policy for supporting pupils with medical conditions. They will ensure that children with medical conditions are appropriately supported, ensure cover for 1:1 in case of absence and briefing supply staff.

2.4 Transitional Arrangements

The school has made the following procedures for transitional arrangements.

- Teachers will have a full internal handover, over the last half term.
- Parents will be advised to contact new schools where applicable.

2.5 All members of **School Staff** may be asked to provide support to pupils with medical conditions, including administering medicines.

- All members of staff should know what to do and respond accordingly if they become aware that a pupil with a medical condition needs help.
- Although administering medicine is not part of a teacher's professional duties, teachers should take into account the needs of pupils with medical conditions that they teach.
- Staff must not give prescription medication or undertake healthcare procedures without appropriate training.
- Office staff are responsible for administering medication when needed. In an emergency, any staff member responsible for that child should administer.

2.6 **Pupils:** Where appropriate, pupils with medical conditions:

- Will be consulted to provide information about how their condition affects them.
- Will be fully involved in discussions about their medical support needs and contribute as much as possible to the development of, and comply with, their individual healthcare plan.

2.7 **Parents** have the prime responsibility for their child's health. Parents include any person who is not a parent of a child but has parental responsibility for or care of a child.

- It only requires one parent to request that medicines are administered. As a matter of practicality, this will be the parent with whom the school has day-to-day contact.
- Parents should provide the school with sufficient and up to date information about their child's medical needs. Parents should tell the school of any change in prescription which should be supported by either new directions on the packaging of medication or by a supporting letter from a medical professional.
- Parents are key partners and will be involved in the development and review of the Healthcare Plan for their child. A request will be sent to parents using Template K;
- Parents should provide medicines and equipment as required by the Healthcare Plan. Parents should:
 - o bring their child's medication and any equipment into school at the beginning of the school year. Medicines should be in their original packaging with the pharmacist's label on;
 - o replace the medication before the expiry date;

- o as good practice, take into school the new asthma reliever inhaler when prescribed;
 - o dispose of expired items to a pharmacy for safe disposal;
 - o during periods of high pollen count, encourage their children, who have been prescribed antihistamines, to take their medication before school so that their condition can be better controlled during the school day;
 - o keep their children at home when they are acutely unwell;
- Parents should ensure that their contact details which are held by the school, are up to date.

3. Staff Training & Support

- The Headteacher will ensure that all staff are aware of the school's policy for supporting pupils with medical conditions and their role in implementing the policy.
- Any member of staff who agrees to accept responsibility for administering prescribed medicines to a child does so voluntarily and will have appropriate training and guidance.
- Training needs will be identified during the development or review of individual healthcare plans and will be reviewed annually. The family of a child will often be key in providing relevant information to school staff about how their child's needs can be met, and parents will be asked for their views but will not be the sole trainer.
- Training will be provided for staff to ensure that they are competent and have confidence in their ability to support pupils with medical conditions, and to fulfil the requirements as set out in individual healthcare plans. Training for new staff will be provided on induction.
- Training will be provided by an appropriate healthcare professional so that staff have an understanding of the specific medical conditions they are being asked to deal with, their implications and preventative and emergency measures so that they can recognise and act quickly if a problem occurs. Template G may be used to confirm staff training.
- Only staff with appropriate training will give prescription medicines or undertake healthcare procedures. (A first-aid certificate does not constitute appropriate training in supporting children with medical conditions).
- The school will ensure that an appropriate number of people have attended Supporting Pupils at School with Medical Conditions training to understand the DfE's Supporting Pupils in School with Medical Conditions guidance and to ensure medicines are appropriately managed within the school. Suitable and sufficient training covering the DfE's Supporting Pupils in School with Medical Conditions guidance training is recommended for at least three people to cover sickness, absence or school trips.

4. Individual Healthcare Plans

Widmer End Community Combined School & Pre-School

Supporting Pupils with Medical & Health Conditions

A Healthcare Plan clarifies for staff, parents and the pupil the support that can be provided. Individual Healthcare Plans for pupils with medical conditions, (e.g. asthma, anaphylaxis, diabetes, epilepsy) will be drafted with parents/pupils and other healthcare professionals where appropriate. The plan will include:

- The medical condition, its triggers, signs, symptoms and treatments;
- The pupil's resulting needs, including medication (dose, side effects and storage) and other treatments, time, facilities, equipment, testing, access to food and drink where this is used to manage their condition, dietary requirements and environmental issues e.g. crowded corridors, travel time between lessons;
- Specific support for the pupil's educational, social and emotional needs – for example, how absences will be managed, requirements for extra time to complete exams, use of rest periods or additional support in catching up with lessons, counselling sessions;
- The level of support needed (some pupils will be able to take responsibility for their own health needs) including in emergencies. If a pupil is self-managing their medication, then this will be stated with appropriate arrangements for monitoring;
 - Who will provide this support, their training needs, expectations of their role and confirmation of proficiency to provide support for the pupil's medical condition from a healthcare professional; and cover arrangements for when they are unavailable;
 - Who in the school needs to be aware of the pupil's condition and the support required;
 - Arrangements for written permission from parents and the Headteacher for medication to be administered by a member of staff, or self-administered by the pupil during school hours;
 - Separate arrangements or procedures required for school trips or other school activities outside of the normal school timetable that will ensure the pupil can participate, e.g. risk assessments;
 - Where confidentiality issues are raised by the parent/child, the designated individuals to be entrusted with information about the child's condition; and;
 - What to do in an emergency, including whom to contact, and contingency arrangements.

Some pupils may have an emergency healthcare plan prepared by their lead clinician that could be used to inform development of their individual healthcare plan.

Healthcare Plans will be reviewed at least annually but some may need to be reviewed more frequently. Where appropriate the Healthcare Plan will be reviewed at the pupil's Annual Review.

5. The Pupil's Role In Managing Their Own Medical Needs

It is our school policy for children NOT to carry their own medication. All medication will be kept securely in their class medical bags. These medical bags are taken to the playground at morning break times and then stored in the medical room over the hour-long lunch break.

The only exception to this is for the residential visits in Year 5 and Year 6, where the medication will stay in the child's bag due to the nature of being separated from school staff. Children will know what to do regarding self-administration and support staff at the residential locations will be aware of medical needs.

6. Managing & Administering Medicines on School Premises

Pupils will only be given prescription or non-prescription medicines after parents or guardians have completed a consent form (Template B). – (except in exceptional circumstances where the medicine has been prescribed to the child without the knowledge of the parents. In such cases the school will encourage the pupil to involve their parents while respecting their right to confidentiality).

When no longer required, medicines will be returned to the parent to arrange for safe disposal. If needle injections are required to be administered, the parent will be expected to provide the sharps box for disposal.

Medicine brought into school must be given to **Mrs Lenton, Office Manager by 9am** on the first day that medicines are due to be administered.

6.1 Prescribed medication

The school will only accept prescribed medicines that are in-date, labelled, provided in the original container as dispensed by a pharmacist and include instructions for administration, dosage and storage. The exception to this is insulin which must still be in date but will be available inside an insulin pen or a pump, rather than in its original container.

- Parents should note the expiry date so that they can provide a new prescription as and when required.
- Medicines will only be administered at school when it would be detrimental to a child's health or school attendance not to do so.
- Where clinically possible, medicines should be prescribed in dose frequencies which enable them to be taken outside school hours.

Short-Term Medical Needs

Many children will need to take medicines during the day at some time during their time in the school. This will usually be for a short period only, perhaps to finish a course of antibiotics, which will minimise the time that they need to be absent.

Antibiotics and Prescribed Medications which are prescribed three times a day can be taken out of the school day. The school will support children who have been prescribed antibiotics & medications that need to be taken

four times a day with **one** dose per day when required. It is the parent's responsibility to bring and collect the antibiotic each day and to complete the necessary forms prior to medicine being administered.

For children staying in the After School Club the designated person(s) will pass antibiotic medicine to the supervisor of the After School Club to return to the parents. Any prescribed antibiotics & medications that need to be taken after school, parents will need to contact the After School Club directly to arrange for antibiotics & medications to be taken.

6.2 Controlled Drugs

- Some medicines prescribed for pupils (e.g. methylphenidate, known as Ritalin) are controlled by the Misuse of Drugs Act, 1971. A pupil who has been prescribed a controlled drug may legally have it in their possession if they are competent to do so, but passing it to another pupil for use is an offence.
- The school will keep controlled drugs in the medical room cupboard, to which only staff have access to. This is easily accessible in an emergency.
- School staff may administer a controlled drug to the child for whom it has been prescribed in accordance with the prescriber's instructions. These staff have had training on administering medication.
 - Mrs Weaver & Mrs Lenton

A record will be kept of any doses used and the amount of the controlled drug held in school, i.e. total number of doses (tablets) provided to the school, the dose given and the number of doses remaining.

- Where the dose is half a tablet then this will be cut using a tablet cutter at the time that the medication is required. Half tablets will be retained but not issued at the time of the next dose; a fresh tablet will be cut, they will be returned to the parent for disposal.
- A controlled drug, as with all medicines, will be returned to the parent when no longer required to arrange for safe disposal. If this is not possible, it will be returned to the dispensing pharmacist.
- Some pupils with epilepsy are prescribed rectal diazepam or buccal midazolam. Templates H or I will be used to gain authorisation for administration from parents.

6.3 Non-prescription Medication

Non-prescription medicines will be administered in exceptional circumstances, only with the relevant consent form 'B'. Parents may come into school to administer medicine if they wish to do so. The consent is available on Arbor Parent Portal to provide consent for staff to administer non-prescription medication. This includes travel sickness tablets on the day of school visits.

6.4 Pain Relief

Pupils sometimes ask for pain relief (analgesics) at school, i.e. paracetamol tablets or liquid.

- A 'form B' must be filled in prior to the office receiving the medication, with consent to administer medicine from the parents. This includes Calpol, paracetamol tablets or Nurofen (ibuprofen). Parents/carers must advise how often to give the medication on the form.
- All children will never be given aspirin-containing medicine unless prescribed by a doctor.
- When a pupil requests pain relief, staff will first check maximum dosages and when the previous dose was taken. Parents will be contacted for confirmation. If parents are unavailable, a dose will not usually be given before 12 noon.
- A record will be made of all doses given using our medicine book and a slip will be sent home with the child.
- The medicine will be given back to parents at the end of the school day and not stored in school, unless they are attending after school club (see section 6.1).

7. Record Keeping

- The school will keep a record of all medicines administered to individual pupils, using the medicine record book to show what, how and how much was administered, when and by whom in the medical room. Any side effects of the medication to be administered at school will be noted.
- A second person will witness the administration of controlled drugs.
- A record will be made where medication is held by the school but self-administered by the pupil, e.g. asthma inhalers

8. Safe Storage of Medicines

- Medicines will be stored strictly in accordance with product instructions - paying particular note to temperature and in the original container in which dispensed.
- Pupils know that their medication is stored in the classroom yellow bags and are able to access them immediately.
- Medicines and devices such as asthma inhalers, blood glucose testing meters and adrenaline pens are always readily available in the medical room and not locked away.
- A few medicines require refrigeration. They will need to be clearly labelled by the parent and will be stored in the **Medical Room** refrigerator, which is not accessible to pupils. A temperature log of the refrigerator will be taken during the period of storage.
- Medication will never be prepared ahead of time and left ready for staff to administer, this includes epi-pens.
- An audit of pupil's medication will be undertaken every term disposing of any medication that is no longer required.

- It is the parent's responsibility to ensure their child's medication remains in date. The school will remind parents when their child's medication is due to expire.
- Children with current healthcare plans will not be allowed in school if their medicine has not been brought in.

9. Disposal of Medicines / Nappies

- Parents are responsible for ensuring that date-expired medicines are returned to a pharmacy for safe disposal. The return of such medicines to parents will be recorded.
- Parents should also collect medicines held at the end of the summer term. If parents do not collect all medicines, they will be taken to a local pharmacy for safe disposal.
- Sharps boxes (provided by the parent/guardian of the pupil requiring injections) will always be used for the disposal of needles.
- Nappies will be disposed of in a nappy bin.

10. Hygiene & Infection Control

All staff should be familiar with normal precautions for avoiding infection and follow basic hygiene procedures.

8 Step Hand Washing Procedures:

Step 1: Wet your hands with water; apply enough soap to cover your hands; rub your palms together.

Step 2: Clean in between your fingers.

Step 3: Use one hand to rub the back of the other hand so both are washed.

Step 4: Rub the base and thumb of one hand with the other hand so both are washed.

Step 5: Grip the fingers of each hand together with the backs of your fingers against the palms of your other hand. Rub your fingertips together and rub the back of your fingers against your palms.

Step 6: Rub the tips of your fingers on the palm of your other hand to clean the fingernails.

Step 7: Wash each wrist using the other hand.

Step 8: Rinse your hands with water and dry completely.

11. Day Visits, Residential Visits & Sporting Activities

- The school will actively support pupils with medical conditions to participate in school trips and visits or in sporting activities.
- The school will make reasonable adjustments for the inclusion of pupils in such activities.
- Some children may need to take precautionary measures before or during exercise, and may need access, for example, to asthma inhalers. Staff supervising sporting activities will be made aware of relevant medical conditions, and will consider the need for a risk assessment to be made.
- The school will consider the reasonable adjustments that can be made to enable pupils with medical needs to participate fully and safely in visits. These arrangements will be included in the risk assessment for the event.
- One member of staff accompanying the visit will be asked to take on the lead role for administering medicines or healthcare procedures. Individual Healthcare Plans, medicines, equipment and consent forms will be taken on school visits.
- Medicines are administered and witnessed and recorded on a copy of Templates D or E. This form is added to the file on return from the visit.

12. School's Arrangements for Common Conditions and Self Care

12.1 Asthma

- An inventory of all pupils with asthma will be compiled.
- An Individual Healthcare Plan will be developed.
- All staff will be trained annually to recognise the symptoms of an asthma attack and know how to respond in an emergency following the guidance in Templates Q & R.
- All inhalers are stored in the class yellow bag, in named bags/boxes.

- Emergency salbutamol inhalers and spacers are kept in the medicine cupboard on the top shelf.
- Emergency salbutamol inhalers will only be given to pupils previously diagnosed with asthma whose reliever inhaler is not in school or whose inhaler has run out, who are on the register and whose parents have signed the consent form.
- All staff will know how and when to use the emergency salbutamol inhaler.
- Parents will be asked to consent via Arbor Parent Portal, giving permission to administer an emergency dose(s).
- Parents will be informed of any emergency dosages given via email.

12.2 Anaphylaxis (Severe Allergic Reaction)

See Allergy Safety Policy

12.3 Epilepsy

- An Individual Healthcare Plan will be developed in consultation with parents & teaching staff.
- All staff will be trained in identifying the symptoms and triggers for epilepsy and how to deal with any seizures in line with pupils' individual needs.
- All first aid trained staff are trained to deliver emergency medication when the pupil is attending school. Details will be recorded on the pupil's Healthcare Plan if this is required.
- A medical room with a sofa will be kept available so that if needed the pupil will be able to rest following a seizure, in a safe, supervised place.
- The school will offer support to pupils to help broaden an understanding of the condition.
- The school will enable students with epilepsy to take a full part in all outings and activities.
- The school will liaise fully with parents and health professionals on a regular basis to ensure that information is kept up-to-date.
- Some pupils with epilepsy are prescribed rectal diazepam or buccal midazolam. This will be administered by staff who are specifically trained to undertake this task and have agreed to this responsibility.
- The administration of any medication will be recorded on Template H or I as appropriate.
- Two adults will be present for the administration of rectal diazepam if required. The dignity of the pupil will be protected as far as possible, even in an emergency.
- If appropriate, a record will be kept of the pupil's seizures, using Template N, so that any changes to seizure patterns can be identified and so that this information can be shared with the pupil's parents and healthcare team.
- The school will work closely with parents to ensure that pupils with epilepsy are treated as individuals and that their needs are fully understood.

Administration of medicines will follow the steps set out in the individual Healthcare Plan.

12.4 Diabetes

- An Individual Healthcare Plan will be developed.
- Pupils diagnosed with Type 1 diabetes and have been prescribed insulin will be supported by staff who have specifically agreed to this responsibility and have received training and support from the Diabetic Nurses Team.
- A suitable private place (the **Medical Room**) will be provided for pupils to carry out blood tests and administer doses.
- Pupils will not be prevented from eating, drinking or taking toilet breaks whenever they need to in order to manage their medical condition effectively.
- If a pupil has a hypo, they will not be left alone; a fast acting sugar, such as glucose tablets, a glucose rich gel, or a sugary drink will be given immediately.
- Once the pupil has recovered, slower acting starchy food, such as a sandwich or two biscuits and a glass of milk, will be given, some 10-15 minutes later.
- Individual cases will follow the plan set out in the Individual Healthcare Plan.

12.5 Intimate Care

- Parents will complete and sign an intimate care plan, which will address the child's specific needs.
- A member of staff known to the child will change their wet/soiled nappy and/or clothing.
- All staff are DBS checked and are familiar with our Safeguarding Policy.
- Staff will be sensitive and respectful to the needs of the child.
- School will work with external agencies/professionals when required.
- Staff will be provided with additional training when needed.
- Resources for intimate care will be provided by parents/carers.

13. Liability & Indemnity

The Governing Body will ensure that the appropriate level of insurance is in place for staff providing support to pupils with medical conditions and appropriately reflects the level of risk.

The school will contact their insurers to extend their cover should a medical intervention fall outside the conditions covered by this policy.

14. Complaints

Parents/pupils should discuss any concerns directly with the school if they become dissatisfied with the support provided. If for whatever reason this does not resolve the issue, they may make a formal complaint via the school's complaints procedure.

15. School Procedures for Managing Medicines

1. Medicines should be brought to the school office by 9am by parents/carers. The designated member of staff will ask the parent to sign the relevant consent form or check the form downloaded from the school's website.
2. The designated person will check that the
 - Medicine is in its original container as dispensed by a chemist and details match those on the form;
 - Label clearly states the child's:
 - o first and last name
 - o name of medicine
 - o dose required
 - o method of administration
 - o time/frequency of administration
 - Patient information leaflet is present to identify any side effects;
 - Medication is within the use-by date.
3. The designated person will log the medicine in the record book and store the medicine appropriately
 - Medicines requiring refrigeration will be kept in the fridge in a clean storage container.
 - A daily temperature of the fridge will be taken by the Caretaker, Robin Jones, and recorded.
4. The designated person will administer medication at the appropriate time.
5. The following procedure will be followed:
 - The pupil will be asked to state their name – this is checked against the label on the bottle, authorisation form and record sheet.
 - The name of the medicine will be checked against the authorisation form and record sheet.
 - The time, dosage and method of administration will be checked against the authorisation form and record sheet.
 - The expiry date will be checked and read out.
 - The medicine is administered.
 - The record sheet is signed by the designated person and the witness.
 - Any possible side effects will be noted.
 - The medicine is returned to appropriate storage.

6. If a child refuses to take their medicine, staff will not force them to do so. Staff will record the incident and follow agreed procedures (which are set out in the pupil's Healthcare Plan) and contact parents. If a refusal results in an emergency, the emergency procedures detailed in the Healthcare Plan will be followed.
7. If the designated person has concerns about a procedure or a medication that they are being asked to administer they will not administer the medicine, but check with the parents or a health professional before taking further action.
8. At the end of the day, parents of a pupil's prescribed antibiotic medication (four doses a day) should collect their child's medicine from the school office and sign it out. For children staying in the After School Club the designated person(s) will pass antibiotic medicine to the supervisor of the After School Club to return to the parents. The After School Club Supervisor will sign and date the back of the authorisation form to confirm that they have received the medicine and accept responsibility to return it to parents.
